

# Truly Managing a Project and Keeping Sane While Wrestling Elegantly With PMBOK, Scrum and CMMI

## WHO THIS COURSE IS FOR?

Project Managers of all levels who want to run their projects with **all** the benefits of PMBOK, Agile and CMMI (or any two).

**Attendees will receive 8 PDUs for this Workshop**

## Testimonials

*"If you are looking for a typical improvement consultant, Neil's not your man, because his approach to the discipline is pragmatic, results-driven and rife with common sense."*

Rob Wyatt, IT Director at Dell Inc.

*"The Process Group is focused on business results and engineering the lightest weight processes to help you achieve them. They helped us mature our development life cycle in a timely and efficient manner without limiting our innovative research and product delivery capability."*

Jim Congdon, Software Engineering Manager, Logos Technologies.

When organizations implement Scrum (Agile), they usually experience challenges because Scrum is a framework, not a complete solution. Adding practices from other frameworks, such as PMBOK and CMMI can seem overwhelming.

When teams see Agile as a complete process solution (rather than a process framework), then the missing practices add cost, schedule and quality risks back to the project. Teams moving from Waterfall to Agile don't eliminate risks, they transfer them. When risks are not assessed or mitigated, they become problematic, even chaotic.

This seminar contrasts CMMI, PMBOK and Scrum, and shows how to treat all three as toolboxes to run a successful project.

### Benefits to you:

- Understand how to use PMBOK and/or CMMI within an Agile project.
- Understand how to use each framework as a toolbox to address project and organizational issues, such as over commitment, chaos and poor quality.
- Understand how to implement and move between any framework without a headache.

### What you will learn:

- Summary of CMMI/PMBOK/Scrum.
- Body of Knowledge vs. Maturity Model vs. Scrum Framework.
- Comparison in detail of CMMI/PMBOK/Scrum, organized by PMBOK section.
- How to use each to run a project and improve schedule, cost and quality.
- Keeping sane, focusing on the way YOU want to run a project.
- Obstacles to look out for.
- Your action plan to improve your organization.

**Wednesday, March 24, 2017, 8:30 a.m. to 5 p.m.**

University of Portland Westside Campus  
suite #230 of Terrace Plaza  
15220 NW Laidlaw, Portland, OR, 97229

Portland Rates	PMI Members	Non-Members
